EFT/400 Card payment application latest

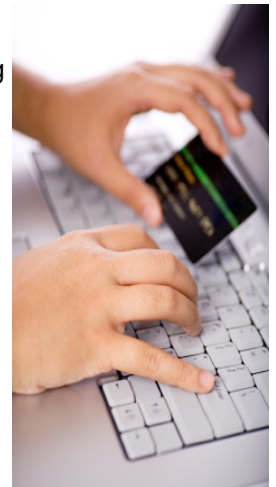

Version 6 Release 1

For those of you out there aren't already aware the System i upgrade version for **V6R1** is available. So if you are planning to upgrade your operating system in the near future let us know.

EFT Modules Available!

Our customers use the EFT/400 in a variety of ways but did you know we have the following modules available:

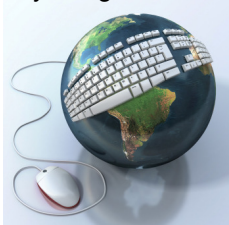

- Processing payments from the internet
- Encryption for data at rest with inbuilt IBM's Key Management tools
- Taking customer not present transactions
- Purchasing Cards
- Recurring payments
- Stored Cards
- Browser Interface—Local or Remote Office
- Chip and Pin
- 3D Secure—Verified by Visa & MasterCard SecureCode

Are you considering trading on the internet or trade already?

As an EFT/400 customer you are already halfway there for taking payments over the internet. Now that we have acquired Karova we can also provide you with the ecommerce application for trading on the internet.

If you need any further information on what we can help you with to grow your business and improve efficiency why not give us a call you have nothing to lose.

There is also information available on our websites www.3xsoftware.co.uk and www.karova.com

Are you paying too much for your Post code data?

Did you know 3X Software is a Postal Address File reseller for the Royal Mail?

PAF applications have come a long way over the years but if you are simply using the data to generate and verify addresses and you are not using our PAF/400 product then the chances are you are paying too much!

Contact us to find out how we can save you money.
